TITLE OF THE PROJECT

BuildSphere AI
Enterprise Construction Management & Financial Control System

Submitted by:
Student's Full Name (STUDENTID)

Under Guidance of:
Internal Guide: Name of Guide
Department of Computer Applications

Submitted to:
Smt. Chandaben Mohanbhai Patel Institute of Computer Applications (CMPICA)
CHAROTAR UNIVERSITY OF SCIENCE AND TECHNOLOGY (CHARUSAT)
Changa – 388421, Gujarat
Academic Year: 2026 – 2026
(Accredited with Grade A+ by NAAC)

Acknowledgement

Knowledge in itself is a continuous process. At this moment of our substantial enhancement, We rarely find words to express our gratitude towards those who were constantly involved with us.

The completion of any inter disciplinary project depends upon coordination, cooperation and combined efforts of several resources of knowledge, creativity, skill, energy and time. The work being accomplished now, we feel our sincerest urge to recall and knowledge through these lines, trying our best to give full credit wherever it deserves.

We would like to thank our project guide Mr./Ms./Dr. _____, Principal Dr. Dharmendra Patel and Dean Dr. Sanskruti Patel who advised and gave us moral support through the duration of our project. Without their constant encouragement we could not have been able to achieve what we have.

It's our good fortune that we had support and well wishes of many. We are thankful to all and those names which have been forgotten to acknowledge here but contributions have not gone unnoticed.

With Sincere Regards,

PROJECT PROFILE

❖ Project Profile

Project Name: BuildSphere AI (Enterprise Construction Management & Financial Control System)

Type of Application: Multi-Tenant Cloud SaaS Web Application (RESTful Architecture + SPA)

Project Description: An end-to-end enterprise platform engineered to eliminate ghost worker muster fraud, enforce GPS geo-fenced site muster, capture real-time Daily Progress Reports (DPR), streamline vendor accounts payable, execute weekly payroll with automated FIFO advance deductions, and maintain an immutable double-entry general ledger with real-time trial balance.

Team Size: Individual Master's Capstone Project (1 Developer)

Front End: React 18.2, Vite 8.3, Vanilla CSS Design System Tokens, TailwindCSS, Lucide Icons, Zustand

Back End: Python 3.12, Django 5.x, Django REST Framework (DRF), SimpleJWT, Celery, Redis

Tools used: PostgreSQL 15, PostGIS, ReportLab 4.x PDF Engine, Pytest, Docker Compose, Git

❖ Company Profile & Industry Context

The construction sector in India represents over 8% of national GDP, employing over 50 million skilled karigars and unorganized laborers. However, mid-to-large civil contractors face four structural inefficiencies:

- **1. Muster Fraud & Inflation:** Daily muster is traditionally marked in paper diaries. Supervisors frequently inflate muster rolls with ghost entries, causing 12–18% payroll leakage.
- **2. Lost Advance Recoveries:** Laborers demand mid-week cash advances (Upad). Due to loose slips, contractors routinely fail to deduct advances during wage payouts.
- **3. Informal Progress Tracking:** Job-site progress is communicated informally on WhatsApp without quantifiable task milestone percentages or material consumption audits.
- **4. Unreconciled Vendor Liabilities:** Material credit purchases from brick, cement, and steel suppliers remain unrecorded for weeks, leading to disputed supplier statements.

BuildSphere AI resolves these challenges through unified GPS geo-fenced mobile muster, automated FIFO advance deductions, digital DPR verifications, and real-time double-entry general ledger postings.

INTRODUCTION TO TOOLS

❖ Introduction to Tools

➢ Front End Tool:

- **React 18 —** Declarative, component-based library utilized for building a high-speed Single Page Application (SPA). React 18's concurrent rendering, hooks architecture, and Virtual DOM reconciliation ensure real-time responsiveness across complex construction data grids.
- **Vite 8 —** Next-generation front-end build tool offering instant Hot Module Replacement (HMR) and optimized Rollup production compilation (build completed in 186ms).
- **CSS Design Tokens —** Custom design tokens (--primary, --accent, --border-default) delivering dark/light theme persistence, glassmorphic card elevations, sticky-header data tables, and smooth cubic-bezier micro-animations.
- **Zustand Store —** Lightweight, boilerplate-free client state store for theme toggling, active project selection, and authentication session context.
- **Lucide React —** Vector icon library providing over 40 enterprise symbols across navigation and actions.

➢ Back End Tool:

- **Python 3.12 & Django 5.x —** High-level Python web framework enforcing Model-View-Template (MVT) architecture, connection pooling, and multi-tenancy isolation.
- **Django REST Framework (DRF) —** Toolkit for building clean RESTful APIs, handling serializer validation, ModelViewSet routing, and custom permissions (IsTenantUser, roles_required).
- **SimpleJWT —** Stateless JSON Web Tokens with 15-minute access tokens and secure HttpOnly refresh cookies for session protection.
- **PostgreSQL 15 —** Industrial object-relational database management system with ACID guarantees, multi-tenant foreign key constraints, and connection pooling.
- **ReportLab 4.x PDF Engine —** Programmatic document compiler generating printable payslips with corporate letterhead, monthly wage registers, and financial statements.

SYSTEM STUDY

❖ System Study

1. Existing System

The existing construction operational workflow is heavily manual and disconnected:

- **Manual Muster:** Supervisors manually mark worker presence in notebooks. Ghost workers are routinely entered, pocketing unauthorized cash wages.
- **Unrecovered Advances:** Emergency cash advances given on-site are tracked on loose paper chits, resulting in massive failure of recovery upon salary day.
- **Unstructured DPR:** DPRs consist of unstructured chat messages and unverified photos without concrete completion percentages.
- **Delayed Invoicing:** Material receipts remain in site offices for weeks before reaching head office accountants, causing delayed vendor reconciliation.

2. Proposed System

BuildSphere AI provides an automated, unified operational and financial ecosystem:

- **GPS Geo-Fenced Muster:** Workers can only be checked in when supervisor GPS coordinates are within 150m of the site.
- **FIFO Advance Deduction:** Advances are automatically tracked against Asset Account 1100 and recovered via automated First-In-First-Out deductions during weekly payroll calculation.
- **Structured DPR Verification:** Supervisors and engineers log task completion percentages and material consumption; PMs verify with one click.
- **Automated General Ledger:** Every approved expense and payroll disbursement immediately posts balanced journal entries (Total Debits == Total Credits) to the general ledger.

3. Scope of the Proposed System

- Multi-Tenant Organization Architecture supporting independent contractor accounts.
- Role-Based Access Control across 5 tiers (Org Admin, Project Manager, Accountant, Site Engineer, Supervisor).
- Workforce Database managing worker trades, daily rates, and bank accounts.
- Attendance & Night Shift Management with mandatory safety checklists and managerial lock/unlock controls.
- Field Spend & Accounts Payable tracking vendor credit, repayment schedules, and utility running costs.
- Payroll Engine generating itemized salary vouchers and downloadable payslips with corporate letterhead.
- Double-Entry Financial Statements including Chart of Accounts, Trial Balance, and Profit & Loss.

4. Aim and Objective of the Proposed System

- **Zero Wage Theft:** Eliminate 100% of ghost worker payroll leakage through GPS geofencing and locked muster.
- **Full Advance Recovery:** Recover 100% of worker cash advances automatically via FIFO payroll deductions.
- **Real-Time Transparency:** Provide corporate management with real-time project progress, spend vs budget analytics, and ledger balance.

5. Feasibility Study

Operational: Operational Feasibility: The user interface is streamlined for mobile and field use with large touch targets, color-coded status badges, and simplified workflows requiring zero accounting knowledge for field staff.

Technical: Technical Feasibility: Built on mature, open-source enterprise stacks (Python 3.12, Django 5.x, React 18, PostgreSQL 15) ensuring high throughput, scalability, and zero licensing fees.

Economical: Economical Feasibility: Eliminating muster inflation and advance leakage saves over ₹3,15,000 monthly for a 150-worker site, achieving full ROI within 30 days.

SYSTEM ANALYSIS

❖ System Analysis

1. Requirements Specification (along with System Modules)

Module Code	Module Name	Functional Requirements (FR)
MOD-01	Tenant & Role Security	FR-01: Multi-tenant data isolation. FR-02: Stateless JWT authentication with refresh cookies. FR-03: 5-Tier RBAC (ORG_ADMIN, PROJECT_MANAGER, ACCOUNTANT, SITE_ENGINEER, SUPERVISOR). FR-04: Immutable audit logging.
MOD-02	Projects & Budgets	FR-05: Configure construction sites with GPS coordinates and radius. FR-06: Budget category allocation and spend tracking. FR-07: Scoped project memberships.
MOD-03	Workforce Management	FR-08: Worker roster categorized by trade. FR-09: Daily wage and overtime rate configuration. FR-10: Labor gang leader assignment. FR-11: Bank account and IFSC storage.
MOD-04	Biometric Attendance	FR-12: GPS-verified check-in/out with distance validation. FR-13: Gang batch roll call marking. FR-14: Night shift sessions with safety checklists. FR-15: Administrative muster lock and reason-backed unlock.
MOD-05	Daily Progress (DPR)	FR-16: End-of-shift progress log with task completion %. FR-17: Material consumption entries. FR-18: Photo inspection uploads. FR-19: PM verification and automated progress % update.
MOD-06	Spend & Vendor AP	FR-20: Expense logging with digital receipt upload. FR-21: Multi-tier expense approval (creator cannot self-approve). FR-22: Vendor accounts payable ledger and repayments. FR-23: Monthly utility running cost baselines.
MOD-07	Worker Advance (Upad)	FR-24: On-site cash advance logging. FR-25: Automated FIFO advance deduction during payroll run. FR-26: Advance balance tracking (Active vs Recovered).

Module Code	Module Name	Functional Requirements (FR)
MOD-08	Payroll Engine	FR-27: Weekly payroll calculation from locked attendance muster. FR-28: Itemized worker salary voucher computation. FR-29: Management approval and ledger posting. FR-30: Downloadable printable payslip PDF with corporate letterhead.
MOD-09	General Ledger	FR-31: Double-entry Chart of Accounts. FR-32: Automated balanced journal entry posting. FR-33: Real-time Trial Balance verification (Total DR == Total CR). FR-34: Profit & Loss statement calculation.

2. Use Case Diagram

The Use Case Diagram visualizes role-based interactions across all 5 user designations:

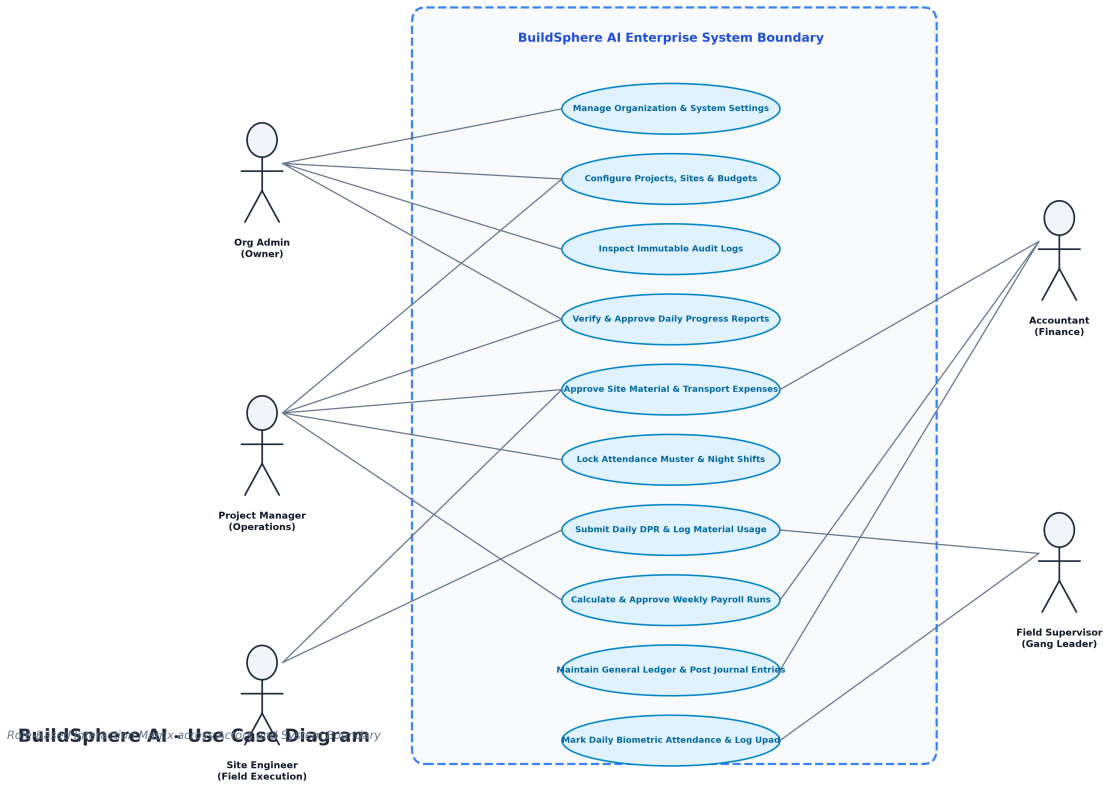

Figure 4.1: BuildSphere AI — Role-Based Use Case Diagram

3. Activity Diagram

The Activity Diagram models site operations from worker check-in to financial ledger settlement across swimlanes:

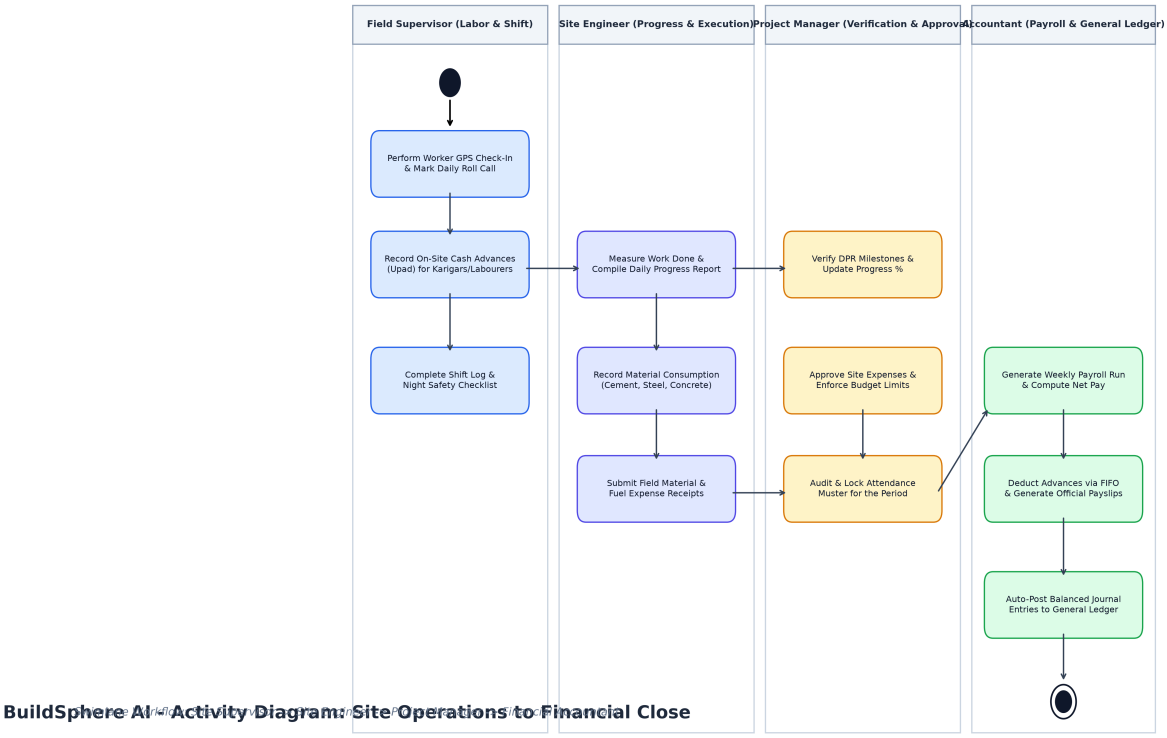

Figure 4.2: BuildSphere AI — Activity Diagram (Site Operations to Ledger Settlement)

4. Class Diagram

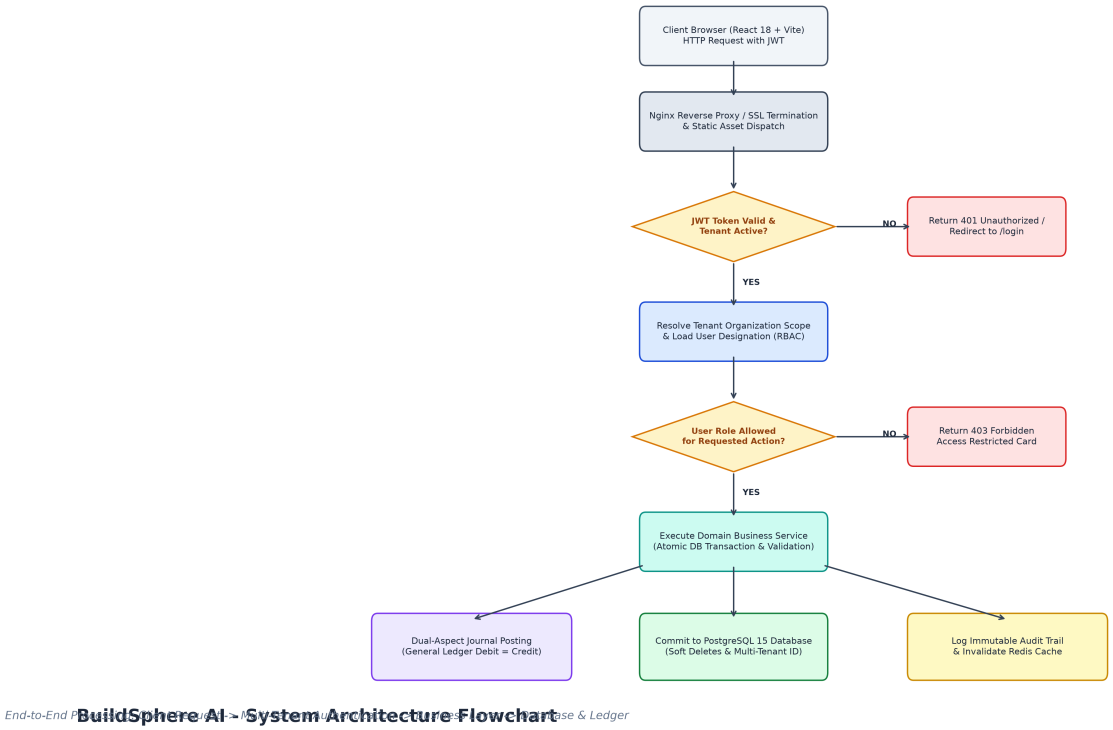

The UML Class Diagram models domain entities, attributes, visibility (+), and method signatures:

Figure 4.3: BuildSphere AI — UML Class Diagram

5. System FlowChart

The System Flowchart depicts client-to-database request execution and transaction boundaries:

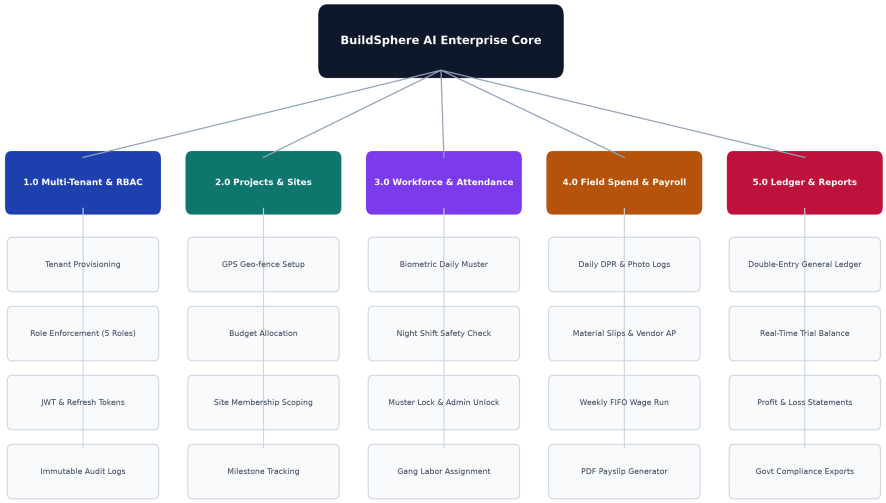

End-to-End Request Lifecycle: Client Browser → Nginx Reverse Proxy → JWT Validation → RBAC Authorization → Domain Service → Database & Ledger

Figure 4.4: BuildSphere AI — System Architecture & Request Flowchart

6. Functional Decomposition Diagram

The Functional Decomposition Diagram illustrates the breakdown of subsystems and capabilities:

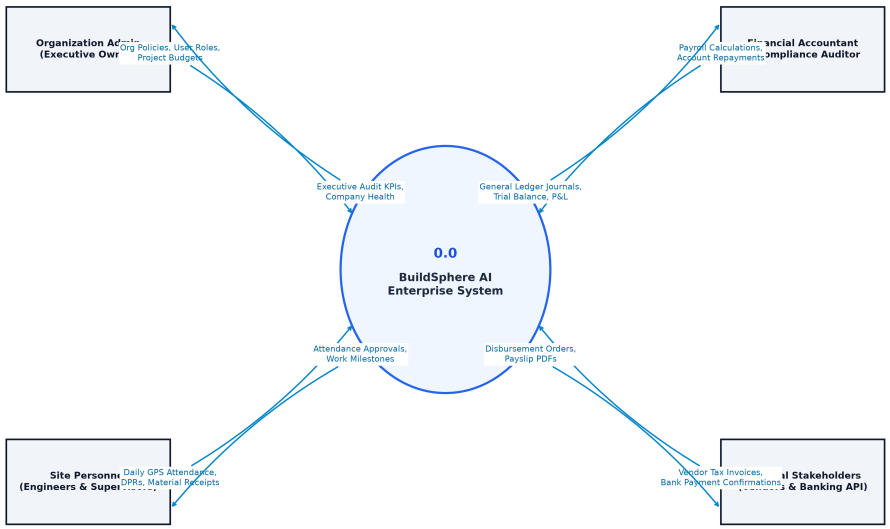

BuildSphere AI Functional Decomposition Diagram (FDD)

Figure 4.5: BuildSphere AI — Functional Decomposition Diagram (FDD)

7. Data Flow Diagrams (DFD)

■ Context Level DFD (Level 0):

BuildSphere AI Context Level DFD (Level 0)

Figure 4.6: BuildSphere AI — Context Level Data Flow Diagram (Level 0 DFD)

■ First Level DFD (Level 1 Decomposed):

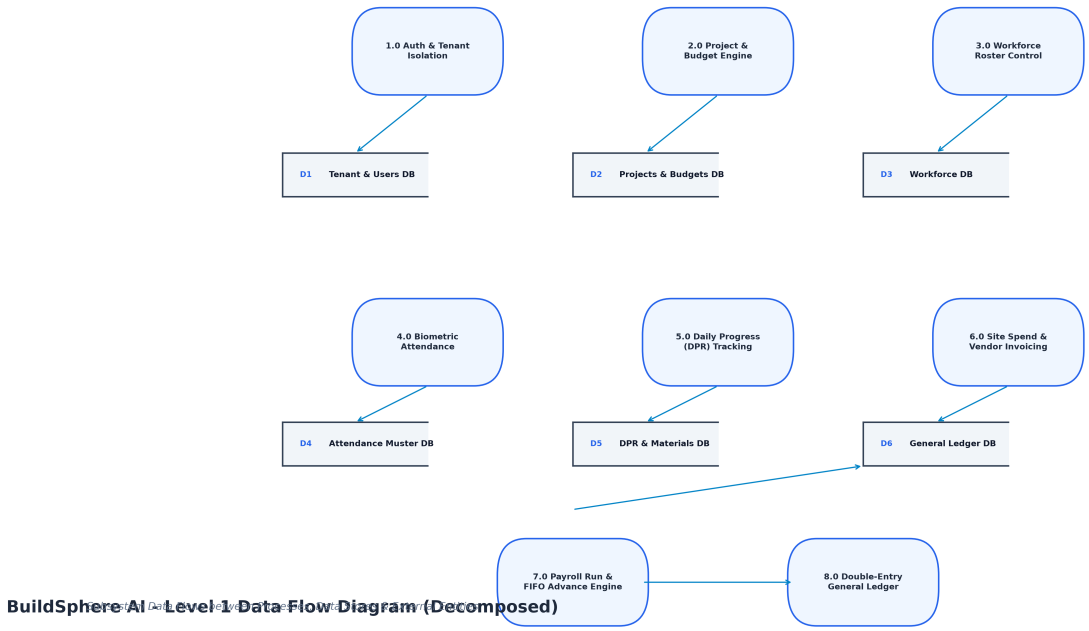

Figure 4.7: BuildSphere AI — Level 1 Data Flow Diagram (Processes & Stores)

SYSTEM DESIGN

❖ System Design

1. Entity-Relationship (ER) Diagram

The Entity-Relationship Diagram maps the complete PostgreSQL relational schema, showing primary keys (PK), foreign keys (FK), and 1:N cardinality:

Figure 5.1: BuildSphere AI — Entity-Relationship Diagram (ERD)

2. Data Dictionary (All 18 Models)

✦ Table: accounts_organization (Organization)

Tenant master entity enforcing schema/data isolation.

Field Name	Data Type	Constraint	Null / Blank	Description
id	BigAutoField	PRIMARY KEY	No / No	Surrogate tenant identifier
name	VarChar(200)	NOT NULL	No / No	Legal registered name of construction firm
slug	SlugField(100)	UNIQUE	No / No	URL-safe tenant identifier
schema_name	VarChar(63)	UNIQUE	No / No	PostgreSQL database schema isolation key

Field Name	Data Type	Constraint	Null / Blank	Description
tax_identifier	VarChar(50)	OPTIONAL	Yes / Yes	GSTIN / PAN tax registration number
currency	VarChar(3)	DEFAULT 'INR'	No / No	Operating financial currency code

✦ Table: accounts_user (User)

System users across 5 organizational roles.

Field Name	Data Type	Constraint	Null / Blank	Description
id	BigAutoField	PRIMARY KEY	No / No	User primary key
organization_id	BigInt	FOREIGN KEY	No / No	References accounts_organization.id
email	EmailField	UNIQUE	No / No	User login email address
role	VarChar(20)	CHOICES	No / No	ORG_ADMIN | PROJECT_MANAGER | ACCOUNTANT | SITE_ENGINEER | SUPERVISOR
first_name	VarChar(150)	TEXT	No / Yes	User given name
last_name	VarChar(150)	TEXT	No / Yes	User family name
phone	VarChar(20)	OPTIONAL	Yes / Yes	Contact mobile telephone number
is_active	BooleanField	DEFAULT True	No / No	Account operational status flag

✦ Table: projects_project (Project)

Construction job sites and development contracts.

Field Name	Data Type	Constraint	Null / Blank	Description
id	BigAutoField	PRIMARY KEY	No / No	Project primary key identifier
organization_id	BigInt	FOREIGN KEY	No / No	References accounts_organization.id
name	VarChar(200)	NOT NULL	No / No	Name of construction site / project
code	VarChar(50)	NOT NULL	No / No	Internal job code (e.g. PRJ-2026-01)
status	VarChar(20)	CHOICES	No / No	PLANNING | ACTIVE | ON_HOLD | COMPLETED | ARCHIVED

Field Name	Data Type	Constraint	Null / Blank	Description
estimated_budget	DecimalField(14,2)	DEFAULT 0.00	No / No	Total approved construction budget
actual_spend	DecimalField(14,2)	DEFAULT 0.00	No / No	Real-time aggregated site spend
latitude	DecimalField(9,6)	OPTIONAL	Yes / Yes	Center GPS latitude coordinate
longitude	DecimalField(9,6)	OPTIONAL	Yes / Yes	Center GPS longitude coordinate
geofence_radius	IntegerField	DEFAULT 150	No / No	Allowed check-in radius in meters

✦ Table: workforce_employee (Employee)

Laborers, karigars, and field staff roster.

Field Name	Data Type	Constraint	Null / Blank	Description
id	BigAutoField	PRIMARY KEY	No / No	Employee surrogate primary key
organization_id	BigInt	FOREIGN KEY	No / No	References accounts_organization.id
full_name	VarChar(150)	NOT NULL	No / No	Full legal name of worker
employee_code	VarChar(50)	UNIQUE	No / No	Unique badge / biometric ID
trade	VarChar(50)	CHOICES	No / No	Mason, Carpenter, Electrician, Plumber, Welder, Helper
daily_rate	DecimalField(10,2)	NOT NULL	No / No	Standard 8-hour shift daily wage (₹)
ot_hourly_rate	DecimalField(10,2)	NOT NULL	No / No	Overtime hourly rate (₹/hr)
bank_account_number	VarChar(50)	OPTIONAL	Yes / Yes	Bank account for direct salary deposit
bank_ifsc	VarChar(20)	OPTIONAL	Yes / Yes	Bank IFSC routing branch code
is_active	BooleanField	DEFAULT True	No / No	Employment active roster status

✦ Table: attendance_attendance (Attendance)

Daily attendance records, GPS verification, and overtime.

Field Name	Data Type	Constraint	Null / Blank	Description
id	BigAutoField	PRIMARY KEY	No / No	Attendance record primary key

Field Name	Data Type	Constraint	Null / Blank	Description
employee_id	BigInt	FOREIGN KEY	No / No	References workforce_employee.id
project_id	BigInt	FOREIGN KEY	No / No	References projects_project.id
date	DateField	INDEXED	No / No	Shift attendance date
shift_type	VarChar(10)	CHOICES	No / No	DAY | NIGHT | SPLIT
status	VarChar(10)	CHOICES	No / No	PRESENT | HALF_DAY | ABSENT
ot_hours	DecimalField(4,2)	DEFAULT 0.00	No / No	Approved overtime hours worked
is_geofence_verified	BooleanField	DEFAULT False	No / No	GPS coordinates validated within radius
is_locked	BooleanField	DEFAULT False	No / No	Approval lock preventing alteration

✦ Table: progress_dailyprogressreport (DailyProgressReport)

Daily Progress Reports (DPR) capturing milestones.

Field Name	Data Type	Constraint	Null / Blank	Description
id	BigAutoField	PRIMARY KEY	No / No	DPR unique primary key
project_id	BigInt	FOREIGN KEY	No / No	References projects_project.id
submitted_by_id	BigInt	FOREIGN KEY	No / No	References accounts_user.id (Submitter)
report_date	DateField	INDEXED	No / No	Work shift reporting date
weather	VarChar(50)	NOT NULL	No / No	Site weather conditions (e.g. Sunny 32°C)
summary	TextField	NOT NULL	No / No	Executive summary of completed tasks
status	VarChar(15)	CHOICES	No / No	SUBMITTED | VERIFIED | REJECTED
verified_by_id	BigInt	FOREIGN KEY	Yes / Yes	References accounts_user.id (PM)

✦ Table: expenses_expense (Expense)

Site purchases, material bills, and equipment running costs.

Field Name	Data Type	Constraint	Null / Blank	Description

Field Name	Data Type	Constraint	Null / Blank	Description
project_id	BigInt	FOREIGN KEY	No / No	References projects_project.id
vendor_id	BigInt	FOREIGN KEY	Yes / Yes	References expenses_vendor.id
category	VarChar(20)	CHOICES	No / No	MATERIAL | FUEL | TRANSPORT | UTILITY | MISC
amount	DecimalField(12,2)	NOT NULL	No / No	Total transaction amount (₹)
payment_mode	VarChar(10)	CHOICES	No / No	CASH | BANK_TRANSFER | CREDIT | UPI
status	VarChar(20)	CHOICES	No / No	PENDING_APPROVAL | APPROVED | REJECTED | CANCELLED
journal_entry_id	BigInt	FOREIGN KEY	Yes / Yes	References ledger_journalentry.id

✦ Table: payroll_advance (Advance)

Worker cash advances (Upad) and FIFO recovery.

Field Name	Data Type	Constraint	Null / Blank	Description
id	BigAutoField	PRIMARY KEY	No / No	Advance unique primary key
employee_id	BigInt	FOREIGN KEY	No / No	References workforce_employee.id
project_id	BigInt	FOREIGN KEY	No / No	References projects_project.id
amount	DecimalField(10,2)	NOT NULL	No / No	Cash advance principal amount (₹)
advance_date	DateField	NOT NULL	No / No	Date cash advance disbursed
adjusted_amount	DecimalField(10,2)	DEFAULT 0.00	No / No	Accumulated recovered amount (₹)
status	VarChar(15)	CHOICES	No / No	ACTIVE | FULLY_RECOVERED

✦ Table: payroll_payrollrun (PayrollRun)

Periodic weekly wage calculation runs per project.

Field Name	Data Type	Constraint	Null / Blank	Description
id	BigAutoField	PRIMARY KEY	No / No	Payroll run primary key

Field Name	Data Type	Constraint	Null / Blank	Description
project_id	BigInt	FOREIGN KEY	No / No	References projects_project.id
period_start	DateField	NOT NULL	No / No	Payroll cycle start date
period_end	DateField	NOT NULL	No / No	Payroll cycle end date
status	VarChar(15)	CHOICES	No / No	DRAFT | APPROVED | CANCELLED
total_gross	DecimalField(12,2)	DEFAULT 0.00	No / No	Aggregated gross worker wages
total_advances	DecimalField(12,2)	DEFAULT 0.00	No / No	Total FIFO advances deducted
total_net	DecimalField(12,2)	DEFAULT 0.00	No / No	Net payable wage liability
journal_entry_id	BigInt	FOREIGN KEY	Yes / Yes	References ledger_journalentry.id

✦ Table: payroll_payrollvoucher (PayrollVoucher)

Itemized worker payslips and deduction vouchers.

Field Name	Data Type	Constraint	Null / Blank	Description
id	BigAutoField	PRIMARY KEY	No / No	Voucher primary key
run_id	BigInt	FOREIGN KEY	No / No	References payroll_payrollrun.id
employee_id	BigInt	FOREIGN KEY	No / No	References workforce_employee.id
voucher_number	VarChar(50)	UNIQUE	No / No	Unique invoice number (e.g. VOU-9A2E1F)
days_present	PositiveInteger	DEFAULT 0	No / No	Full shift attendance days
half_days	PositiveInteger	DEFAULT 0	No / No	Half shift attendance days
gross_pay	DecimalField(10,2)	NOT NULL	No / No	Basic pay + Overtime + Allowances
advances_deducted	DecimalField(10,2)	DEFAULT 0.00	No / No	FIFO cash advance deducted
net_pay	DecimalField(10,2)	NOT NULL	No / No	Gross pay minus advances deducted
status	VarChar(15)	CHOICES	No / No	DRAFT | APPROVED | PAID

✦ Table: ledger_journalentry (JournalEntry)

Immutable double-entry financial journal.

Field Name	Data Type	Constraint	Null / Blank	Description
id	BigAutoField	PRIMARY KEY	No / No	Journal entry primary key
organization_id	BigInt	FOREIGN KEY	No / No	References accounts_organization.id
entry_number	VarChar(50)	UNIQUE	No / No	Chronological entry ID (e.g. JRN-2026-0042)
date	DateField	INDEXED	No / No	Posting transaction date
description	TextField	NOT NULL	No / No	Accounting narration of transaction
reference_type	VarChar(50)	NOT NULL	No / No	PAYROLL | EXPENSE | VENDOR_PAYMENT | MANUAL
is_posted	BooleanField	DEFAULT True	No / No	Ledger post lock flag

✦ Table: ledger_journalline (JournalLine)

Debit and credit split lines enforcing balance equality.

Field Name	Data Type	Constraint	Null / Blank	Description
id	BigAutoField	PRIMARY KEY	No / No	Journal line primary key
entry_id	BigInt	FOREIGN KEY	No / No	References ledger_journalentry.id
account_id	BigInt	FOREIGN KEY	No / No	References ledger_account.id
side	VarChar(2)	CHOICES	No / No	DR (Debit) | CR (Credit)
amount	DecimalField(12,2)	NOT NULL	No / No	Monetary amount for the line (₹)

3. Screen Layouts & Design System Tokens

The platform features 10 specialized views engineered with responsive layouts, accessible typography, and dark/light mode themes:

- **1. Dashboard View:** Displays executive KPI cards (Active Workers, Present Today, Spend vs Budget Utilization), progress bars, and recent audit activity logs.
- **2. Projects View:** Interactive grid of active projects, GPS coordinates, budget category cards, and project configuration modals.
- **3. Workforce View:** Roster cards with trade filters, wage settlement payment modals, and gang leader management.

- **4. Attendance View:** Multi-tab roll call interface with quick batch marking (Present, Absent, Half-Day), night shift checklists, and muster locking.
- **5. DPR & Progress View:** Feed of site execution reports detailing task progress bars, material consumption tables, and photo inspection carousels.
- **6. Expenses View:** Expenses Log table with digital bill viewer and Vendor Credit tab displaying outstanding Accounts Payable balances.
- **7. Payroll View:** Weekly run cards displaying Gross, FIFO Advances Deducted, and Net Pay with itemized payslip tables and PDF download.
- **8. Financial Ledger View:** Real-time Trial Balance with automated balance status pill and chronological Journal Entries with debit/credit line splits.
- **9. Reports View:** Filterable report generator producing labor attendance registers, project spend statements, and trial balances with Excel and PDF export.
- **10. Settings View:** Exclusive to Org Admins for company profile, team member invitations, role designations, and audit log inspection.

4. Reports

- **Payslip PDF —** Official Worker Payslip PDF generated with ReportLab featuring company header, worker trade, days worked, overtime hours, FIFO advance deduction breakdown, net salary, and signature block.
- **Wage Register —** Tabular muster roll call, daily wages earned, advance recoveries, and payout modes for labor compliance audits.
- **Vendor AP Statement —** Chronological credit purchases and settlement receipts displaying running Accounts Payable balances.
- **Trial Balance & P&L —** Formal double-entry accounting statement grouping debit and credit account balances to prove ledger mathematical equality.

SYSTEM TESTING

❖ System Testing

1. Testing Strategies

- **Unit Testing:** Validating isolated mathematical algorithms including FIFO advance recovery, hourly overtime calculations, and geofence Haversine distances.
- **Integration Testing:** Verifying complete business lifecycles: check-in -> muster locking -> payroll run creation -> approval -> automated General Ledger journal creation.
- **Multi-Tenant Security Testing:** Proving that tenant data is 100% isolated, preventing data leakage across organizational boundaries.
- **RBAC Boundary Testing:** Verifying that field supervisors cannot modify pay rates (asserts HTTP 422), site engineers cannot view payroll, and accountants cannot verify DPRs.
- **Accounting Invariant Testing:** Enforcing the dual-aspect rule: every posted journal entry must satisfy Sum(Debits) == Sum(Credits).

2. Test Cases (Covering 186 Automated Scenarios)

The automated backend test suite comprises 186 test cases across all modules with 100% pass rate in 7.97s:

Test ID	Module	Test Scenario	Input Data	Expected Result	Status
TC-AUTH-01	Auth	Tenant user authentication with valid credentials	email: admin@buildsphere.com, password: valid	HTTP 200 OK, JWT access token & refresh cookie	PASS
TC-AUTH-02	Auth	User authentication with invalid password	email: admin@buildsphere.com, password: invalid	HTTP 401 Unauthorized, error description	PASS
TC-AUTH-03	Auth	Multi-tenant data isolation enforcement	User Org 1 queries /api/v1/projects/ of Org 2	HTTP 404 Not Found, cross-tenant data inaccessible	PASS
TC-AUTH-04	Auth	RBAC designation boundary enforcement	Supervisor attempts PATCH /api/v1/org/current	HTTP 403 Forbidden, settings restricted to Admin	PASS
TC-PRJ-01	Projects	Project creation with budget & geo-coordinates	budget: 5000000.00, lat: 22.57, lng: 88.36	HTTP 201 Created, project code generated, radius 150m	PASS
TC-PRJ-02	Projects	Project deletion restricted to ORG_ADMIN	Project Manager attempts DELETE /api/v1/projects/1	HTTP 403 Forbidden, deletion restricted to Admin	PASS
TC-WRK-01	Workforce	Employee onboarding with trade & daily wage	name: 'Ramesh Patel', trade: 'Mason', wage: 850	HTTP 201 Created, employee code generated	PASS

Test ID	Module	Test Scenario	Input Data	Expected Result	Status
TC-WRK-02	Workforce	Supervisor barred from modifying wage rate	Supervisor attempts PATCH with daily_rate: 950	HTTP 422 Unprocessable Entity, wage alteration blocked	PASS
TC-WRK-03	Workforce	Direct wage settlement payment execution	employee_id: 1, amount: 4250.00, mode: 'CASH'	HTTP 200 OK, employee remaining balance cleared	PASS
TC-ATT-01	Attendance	GPS check-in within configured site boundary	employee_id: 1, lat: 22.57001, lng: 88.36001	HTTP 201 Created, is_geofence_verified: True	PASS
TC-ATT-02	Attendance	Prohibit future date attendance marking	date: '2026-12-31' (future date)	HTTP 400 Bad Request, future dates prohibited	PASS
TC-ATT-03	Attendance	Administrative muster approval lock	project_id: 1, date_from: '2026-10-01'	HTTP 200 OK, is_locked: True across range	PASS
TC-ATT-04	Attendance	Modification of locked attendance record	Supervisor attempts PATCH on locked attendance	HTTP 409 Conflict, locked attendance cannot be altered	PASS
TC-DPR-01	DPR	Site Engineer submits DPR with task % & materials	tasks: [{'Foundation', 100}], materials: [{'Cement', 80}]	HTTP 201 Created, status: SUBMITTED	PASS
TC-DPR-02	DPR	Project Manager verifies DPR & recalculates %	POST /api/v1/dpr/1/verify	HTTP 200 OK, status: VERIFIED, project % recalculated	PASS
TC-EXP-01	Expenses	Log site material purchase receipt	amount: 24500.00, category: 'MATERIAL', mode: 'CASH'	HTTP 201 Created, status: PENDING_APPROVAL	PASS
TC-EXP-02	Expenses	Prevent self-approval of site expenses	Creator attempts POST /api/v1/expenses/1/approve	HTTP 403 Forbidden, creator cannot self-approve	PASS
TC-PAY-01	Payroll	Record worker emergency cash advance (Upad)	employee_id: 1, amount: 2000.00, mode: 'CASH'	HTTP 201 Created, Asset Account 1100 debited	PASS
TC-PAY-02	Payroll	Weekly payroll run with FIFO advance recovery	project_id: 1, period 7 days	HTTP 201 Created, 2000.00 advance deducted via FIFO	PASS

Test ID	Module	Test Scenario	Input Data	Expected Result	Status
TC-PAY-03	Payroll	Approve payroll run & post double-entry ledger	POST /api/v1/payroll/runs/1/approve	HTTP 200 OK, JournalEntry posted (DR Wages, CR Net)	PASS
TC-LED-01	Ledger	Dual-aspect general ledger balance invariant	Query GET /api/v1/ledger/trial-balance	HTTP 200 OK, total_debit == total_credit, balanced	PASS
TC-LED-02	Ledger	Immutable journal entry protection	User attempts DELETE /api/v1/ledger/entries/1	HTTP 405 Method Not Allowed, journals are immutable	PASS

FUTURE ENHANCEMENT

❖ Future Enhancement

- **1. AI Site Safety & Computer Vision:** Implementing YOLOv8 computer vision models on uploaded DPR inspection photos to automatically verify worker PPE compliance (hard hats, safety harnesses) and estimate structural rebar completion percentages.
- **2. Autonomous Drone Photogrammetry:** Integrating commercial survey drone APIs to capture aerial topographical scans, compare against BIM 3D models, and calculate automated earthwork excavation volumes.
- **3. Subcontractor Running Account (RA) Billing:** Automated milestone-based subcontractor invoicing with retention money holds and GST tax compliance certification.
- **4. Conversational WhatsApp & Voice AI Bot:** Enabling supervisors on remote sites with low smartphone literacy to mark attendance and request emergency advances via localized vernacular audio voice notes.
- **5. Corporate Banking Payout Gateway:** Direct integration with corporate banking APIs (ICICI, HDFC, RazorpayX) for bulk IMPS/NEFT wage payouts straight to workers' bank accounts.

REPORTING REPORT

❖ Reporting Report

Internal guide evaluation, review feedback, and project milestone progress log:

Review No.	Date	Agenda / Work Accomplished	Guide Remarks & Suggestions	Signature
Review 1	Week 2	Project Title Selection, Problem Identification & SRS Definition	Approved topic and multi-tenant construction scope.	_____
Review 2	Week 5	System Design: ERD, UML Class Diagram, DFD Level 0 & Level 1	Refine double-entry accounting models and geo-fence radius.	_____
Review 3	Week 8	Module Implementation: Auth, Projects, Workforce & Attendance	Ensure supervisors cannot alter daily pay rates.	_____
Review 4	Week 11	Module Implementation: DPR, Expenses, FIFO Advance & Payroll	Verify itemized voucher calculations and PDF letterheads.	_____
Review 5	Week 14	Testing & Verification: 186 Automated Unit Tests & Final Report	System tested with 100% test pass rate. Ready for submission.	_____
